Design.

The Tech Lounge can design your network and infrastructure from the ground up, or redesign your current infrastructure to better suit you. Our goal is to make technology work for you.

IT Solution & Network Design.

Every great design begins with an even better story. In this case, it's the story of your business. Your short and long-term plans and aspirations. Where you've come from and where you want to be.

At The Tech Lounge our mission is to provide our clients with quick, reliable, scalable and cost effective IT solutions, delivering increased performance and reliability. Crucially, helping you to achieve greatness!

Once we understand how your unique business needs to operate, we work with you & your team to choose the best equipment for the job. The right computers, servers, routers and devices you'll need to help accomplish those goals, supporting your overall plan and budget. We provide full technical details, costings and supplier options. All the information you need to make a fully informed decision.

Better still, we do all this and there is no obligation to buy from us.

And if you already have a solution in place that needs updating, we can do a full redesign to reflect and compliment the advancements in your business.

As you'd expect, we cover all the basics and a whole lot more:

- Computer network installation
- Wireless network installation & signal improvement
- Smartphone & tablet solutions
- Server architecture
- Network security, anti spam & virus solutions
- Network integration
- Hardware and software selection
- Disaster recovery & business continuity solutions

We design and implement fast, reliable, top performance IT networks to help you efficiently run and grow your business.

“ I just want to say a huge thank you to The Tech Lounge for your expertise in bringing my computer system up to date and with minimal disruption to my business. The help, advice and service given, especially regarding the back-up systems, has given me great peace of mind. ”

Pauline Benham | Account Right

Implementation.

The Tech Lounge can set up your new laptop or PC, or fit out your entire office. We can implement secure networking, automated backups and even anti-spam and anti-virus solutions.

Setup & Installation.

Our fully customised installation services are focused on speed, efficiency and keeping your business running at maximum productivity levels.

A well-designed and professionally installed network will minimise problems in the future, keeping downtime at bay. It can also have the capacity to grow with your business and that takes a lot of experience and a stack of know-how.

Despite technology making computers easier to use, setting up and installing a new one can be time-consuming and tricky, even for those with a decent technical ability.

At The Tech Lounge we provide a range of implementation services that are aimed at getting you up and running fast and keeping you on the road to success. And we make sure that things are done in the way your business really needs them.

Whether it's a single PC install or a dozen Mac's, a tablet or mobile device, a wireless network or printer, or indeed a whole office fit out, The Tech Lounge is ready to help.

As you'd expect, we cover all the basics and a whole lot more:

- Site survey & report
- Hardware & software recommendations & guidance
- Equipment procurement
- Structured cabling
- Fully documented installation & setup
- Installation at times to suit you and your business
- WEEE certified disposal & recycling (WEEE Regulations 2006)

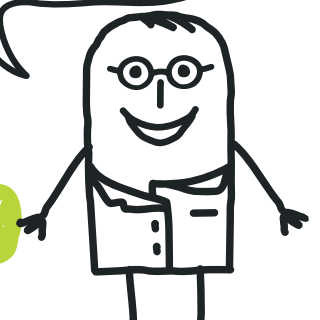

The Tech Lounge gets you off to the right start. We install fully optimised and streamlined solutions, ensuring you meet today's tough demands.

“The Tech Lounge has been brilliant with helping us set up... The backup service is great and any query we have had has been answered quickly and efficiently.”

Sue Green | Party Line
